EDUCATION

INSAT (Institut National des Sciences Appliquées et de Technologie)

Tunis, Tunisia

Engineering Diploma - Computer Science & Networking

Sept 2021 – Present

- Focused on networking, telecommunications, and communication systems within a rigorous engineering curriculum in computer science.

PROFESSIONAL EXPERIENCE

Software Engineering Intern

July 2026 – Aug 2026

PwC France

- Built a gateway that optimizes routing of prompts across a set of models based on price and benchmark performance.
- Focused on scalability and statelessness in the system's design.

Cloud Engineer - Part Time

July 2025 – July 2026

Bemysense, Doha, Qatar

- Managed AWS infrastructure, optimizing performance, security, and scalability.
- Contributed to backend development alongside cloud operations.

Cloud Intern

July 2025 – Aug 2025

CarbonJar

- Built AWS infrastructure using Terraform for a SaaS platform focusing on scalability, reliability, and automation.
- Strengthened hands-on cloud and DevOps skills in a production environment.

DevOps Intern

June 2024

JoodLab

- Implemented CI/CD pipelines using GitHub Actions.
- Automated deployments using Docker, improving process efficiency.

PROJECTS

Orbit - Kubernetes CTF Platform

Jan 2025 – Apr 2025

IEEE CS INSAT & CCK

- Built a Kubernetes-based Capture The Flag platform for DevOps challenges.
- Deployed and operated the platform for IEEE CS INSAT chapter events.

CineVault - Movie Theater Management Platform

Nov 2025 – Jan 2026

Personal Project

- Built a full-stack movie theater management platform: a NestJS/TypeORM API backed by MySQL, with an Angular 19 standalone frontend.
- Implemented JWT authentication with role-based access, plus catalog, screening, booking, review, and reporting modules.
- Wrote Kubernetes manifests with an HPA for backend autoscaling and a GitHub Actions CI pipeline (lint, unit tests, build, k6 smoke tests).

UniFunl - Azure to AKS Migration

Mar 2026 – Present

Personal Project

- Wrote Terraform modules to provision the AKS cluster, database, and Redis cache as reproducible infrastructure-as-code, with remote state locking in Azure Blob Storage.
- Migrated the platform's core services to AKS, containerized behind Kubernetes with Workload Identity for secretless Azure authentication.
- Benchmarked performance before/after the migration with k6, comparing Azure App Services and AKS under load.

CERTIFICATIONS & SKILLS

Certifications: Certified Kubernetes Administrator (CKA)

Cloud & DevOps: AWS, Azure, Kubernetes (AKS/Minikube), Docker, Terraform, CI/CD, GitHub Actions

Monitoring: Prometheus, Grafana, k6

Programming: Flask, NestJS, ExpressJS, Angular

Tools: Git, Linux

Languages: Arabic (native), English (C1), French (B2), Spanish (A2)
